VISHWA ABEYRATHNE

undergraduate at SLIIT

About Me

I'm a dedicated Bachelor of Information Technology student specializing in Information Technology, with strong leadership, time management, and problem-solving abilities. I bring creativity, critical thinking, and clear communication to every project I take on. Known for taking initiative and working well in teams, I'm eager to contribute and grow in a professional environment, whether through an internship or an entry level role.

PROJECTS

- **Implemented a Spice Store And Management System(MERN)**
  Technologies: , Node.js Js React.js, JavaScript,Express.js, MongoDB, Postman API, HTML, CSS
  My function is User Management, which includes authentication through two-step OTP verification using Brevo SMTP, and authorization through role-based access control. The Admin can perform full CRUD operations on user details, reset passwords, activate or deactivate users, and generate user summary reports.

- **Implemented a Finance Tracker App (Android Application)**
  Technologies: Android Studio (Kotlin), shared preference
  PocketBrain is a personal finance tracker app developed using Android and Kotlin, designed to help users manage income and expenses effectively. It features category-wise analysis, monthly budget tracking, and secure data storage using SharedPreferences. The app also supports data export/import in JSON format and file sharing via FileProvider.

- **Implemented an Online Vaccination Portal**
  Technologies: HTML, CSS, JavaScript, PHP
  Developed an online vaccination system for our 1st year 2nd semester IWT module project.

- **Implemented a Gaming site (OOP Project)**
  Technologies: HTML, CSS, Java, MySQL, JavaScript
  gaming site built with Eclipse and Java allows user registration, login, and role-based access control. Admins can manage game reviews with full CRUD operations. Users can submit and view reviews through a JSP interface connected to a MySQL database.
